

CORE IDEALS OF AMERICAN SOCIETY

In which of our national document(s) (Declaration of Independence, Constitution, etc...) can you find the core ideal Equality?

Equality can be found in the U.S. Constitution.

As a society today, or throughout our history, explain how have we moved toward and/or away from that ideal.

As a society, we have grown towards equality through many acts in U.S. history. During the African-American Civil Rights movement, Martin Luther King Jr. made a great impact on Equality in our nation. He made many speeches regarding equal rights for african-americans in our nation. An amendment in the Constitution also stated that individual rights would not be denied by any state in the U.S. because of someone's sex. Equality has been increased in our nation by many ways in our history.
