CORE IDEALS OF AMERICAN SOCIETY

In which of our national document(s) (Declaration of Independence, Constitution, etc...) can you find the core ideal _Truth_____?

As a society today, or throughout our history, explain how have we moved toward and/or away from that ideal.

In my opinion we have moved moth toward and away from the core ideals of american society. Truth is what I think we have moved toward and away from. The people should expect and demand that the government not lie to them and the government should disclose information to the people. The government and its people should not lie. Vise versa the government should expect that the people not lie to them
