CORE IDEALS OF AMERICAN SOCIETY

In which of our national document(s) (Declaration of Independence, Constitution, etc...) can you find the core ideal _____?

As a society today, or throughout our history, explain how have we moved toward and/or away from that ideal.

As a society we have moved toward equality. Equality in the past was generally aimed towards white males and no one else. Many things like women's rights helped with the furthering of the united states. The Civil war was a turning point for black right in the United States because it provoked people to start caring about slavery and miss treatment of people. The United States have come very far in the development of equality.
